HANAKLICE-HINSIDE, N.C. - A new nationwide vote has been scheduled for a constitutional reform proposal of the Haneaklice Village Council. Historically, the village government has operated by the appointment process, where a mayor was appointed by the village's board of trustees. With the village adopting a charter in July 2013, the village government was changed to a council-manager form of government. The village residents voted to change the form of government in the May 8, 2014 election. During the regular business meeting on June 12, the village manager presented the proposed changes for the November ballot that would allow the village government to continue to operate by the appointment process as opposed to a council-manager form of government. On July 16, the village board of trustees asked the village manager to recommend a referendum to allow the voters to decide whether the council-manager form of government should be changed back to the appointment process. The vote will be held on December 11. Voters can comment on the proposed change by writing their comments on the proposed ballot or by contacting your councilman. Voters can also download a blank ballot at In 2014, U.S. census data showed that Haneaklice's population is approximately 175, for the first time since the 1990 census, the village population was over 100. The village is located on the east side of Lenoir County on Highway 120 on the north side of the Swain County line. The proposed charter changes can be read at FILED NOT FOR PUBLICATION 6a5afdab4c

What's New in the?

AVOne Video Converter is an application which you can use to encode video clips between various formats, including AVI, MPG, WMV, 3GP, MP4 and DVD. The interface of the tool is plain and simple to navigate through. Video clips can be imported by using the file browser only, since the "drag and drop" method is not supported. Batch processing is allowed. So, all you have to do is specify the output format, file name and destination, in order to proceed with the conversion process. In addition, you can edit the format profile when it comes to audio and video settings like codec, frame size, bit rate, width and height, frame rate, sample frequency rate and channels. Settings can be restored to their initial values or saved as default. Plus, you can merge videos as well. The video conversion tool quickly finishes a task while using a low amount of system resources. The image and sound quality is generally preserved at a very good level. Also, there is a well-written help file with snapshots that you can check out if you don't know how to get started. On the other hand, AVOne Video Converter crashed on several occasions during our tests, every time time we tried selecting a DVD for processing. Plus, you cannot configure any type of program settings (e.g. minimize the app to system tray, automatically turn off the computer when all tasks are completed). All in all, AVOne Video Converter is a pretty good software for encoding video files, even if it comes with a few glitches. We suggest you give it a shot, since it delivers good results.Q: Add separator in the list according to the condition I have a List of custom objects in Python. My object has a "Num" field that can be either 0 or 1. The list contains items with different "Num" values. I want to append a separator to the list if "Num" is 0 or 1. For example, if the first object's "Num" field is 0 and the second one has 1, the list should look like: 0: obj1 1: obj2 I tried using the following method: mylist = [obj1, obj2] def get_new_list(mylist): is_list_has_zero_or_one = [i for i in mylist if i.Num
