Q: How to set value for textView as per my data? I'm trying to set value for my textView. I have an arraylist called results which contains List objects. First i want to take the only data which is inside my arraylist, then i will append it to my textView. Here is my code,

```
public void displayListView() { // TODO Auto-generated method stub
    List listItems = objectItems.getListItems();
    List listItems1 = new ArrayList();
    for (int i=0; i < listItems.size(); i++) {
```

Abnormal fix - a fix for a problem that was not part of the original game. Since game developers change their mind about including new game features all the time, it is best to make a backup copy of your game files. This can be done manually by renaming the game to the original filename, but a better approach is with a program such as GameBackup. This can be used to automatically make backups of your games.
