CalPicker is a utility that enables you to efficiently extract data from a single or multiple documents based on customizing fields you want to process. Types of document data that can be processed: - phone numbers - dates - addresses - URLs - points and percentages - text you want to extract This tool can extract: - Phone numbers - Dates - Addresses - URLs - Text - Links - Points and percentages - Tags and attributes The input file should be in plain text format, may be no more than one page and should be no larger than 3MB. The program displays a text preview of the document before the actual extraction. This program works on Windows XP, Vista, 7, 8, 8.1, 10 and macOS. CalPicker can be downloaded here: CalPicker is an application that enables you to process extended content faster by providing you with a simple method of extracting numerical values or text based on a specified identifier. Comes with an unpolished, yet intuitive interface In spite of the fact that it is not a looker, the interface is intuitive, clean and should not pose any real challenge with navigation irrespective of your technical skills. While in the middle section of the main window you can import the text document you want to process, you can preview it in the upper panel. The lower region of the UI is dedicated to defining the extraction criteria and displaying the results. It would have been nice if the tool allowed you to add documents with drag and drop, supported multiple files processing and came with larger panels for previewing the original content and extraction results. Then again, the program supports the standard Windows commands for copy, paste, undo and redo so at least you can go through documents smoother. Allows you to extract sums and custom expressions The idea behind the utility is to enable you to extract numerical values from large text documents with and aggregate the relevant numbers with the corresponding text in just a few clicks. Once the extraction is complete, you can just click on the result and preview its location in the original document, so you can make modifications or copy the paragraph to another document or file. You should know that while you can also paste the content into the dedicated field, the import function automatically identifies the numeric values in a text. The utility enables you to edit the expression box
