DevPoint Portable Keygen For (LifeTime)

DevPoint is a free, innovative, lightweight and efficient text editor and IDE for your computer that aims to help you create word-processed documents as well as to write programming codes. The IDE gives you hundreds of options to make your work easier. You can change settings, do automatic syntax checking, text colors and font, as well as view the active windows side by side. You can also split the current viewing mode to open multiple docs at the same time. This freeware also has several options to help you with your coding, like code completion, line breaks and whitespace, clipboard watcher, macro recorder, contrast analyzer, help, and much more. No setup required This program does not install any desktop software, registry entries, or extensions. All the files are stored in the.exe itself. You don't need to set up anything else. All functions are tested against Windows XP, Windows Vista, and Windows 7, 32-bit and 64-bit editions. Highly efficient This program's design takes very little of your computer's resources, since it doesn't affect its performance. DevPoint is very light on system resources and does not take a lot of CPU and RAM. The language configuration can be set to work on the fly, the current file can be decrypted with a password, and you can also generate HTML files of the current document at any time. Clear-cut interface and options DevPoint is a very simple text editor, but it allows you to create a new document by specifying a name and a type. It has a split viewing mode where you can place multiple opened files side by side. Enable/disable code automatic completion, syntax check, line breaks and whitespace, insert comments and highlight syntax This freeware has a clean, simple interface, and it is easy to use. The options are easy to find and use. It's possible to encrypt the file with a password, save it to the clipboard, or export it to HTML format. It's also possible to close active windows, send the settings to DevPoint. With DevPoint, it's easy to view the active windows and also to keep the frame always on top of other windows. Explore coding features DevPoint has over 200 options to help you with your coding. It's possible to do code completion, text insertion, highlight syntax, manage an indented editor, text encoding, macros, text color, clipboard watcher, contrast analyzer, syntax support, help,

What's New In DevPoint Portable?

DevPoint is a freeware that works for Windows XP, Vista, 7, 8, and 10. Upon installation, the program will ask you if you want to add it as your standard text editor for any documents. If you select "Yes", DevPoint will make itself the default editor for any document. If you select "No", you can use your preferred text editor (like Notepad) as the default text editor, and DevPoint will allow you to make most of its coding features available when coding. DevPoint is a simple text editor that offers you a few free basic features without the need to configure the program. Here are some features that you can use to create and manage your documents:

- Create, open, edit and save your documents
- View the document character by character
- View the document line by line
- Create, open, and save multiple documents
- Have your text editor always on top of other applications
- Create, save and load multiple themes
- Choose a default language
- Wrap lines and format code
- Select your favorite colors
- Use a clip board watcher
- Automatically change the file encoding based on the content
- View and edit tags in your files
- Show and hide/toggle auto indent
- Setup to automatically show/hide the keyboard and switch to the next field
- Automatically insert line breaks and spaces
- Configure font, indentation and auto complete options
- Encrypt documents with a password
- A HTML export option

You can export your documents to any of the many multiple formats that you can save to

- You can insert snippets from an external file
- Learn which lines are being used by the compiler and what is considered a blank line
- Undo everything you type with the keyboard or with the mouse
- View the number of lines in each document
- Add code snippets to the right of the text editor
- Add auto-completion for many of the most common languages including C#, PHP, Perl, Ruby, Python, etc.
- Play macros with the mouse (screenshots included)
- Save your code in more than 30 languages
- View the line numbers/indentation and colours in the editor
- Use alternative syntax highlighting languages if you want
- There are hundreds of options that you can change to personalize your editor
- Use filters for categories/keywords in the search
- Use a different view (or command line) for HTML documents
- Use a

System Requirements:
