The Gradient tool lets you change the intensity of one color to another.

Gradient tools can be used to create custom brushes or to fill in areas of an image with color. They also make it easy to quickly fill an area with a background color. To create a custom brush, select Gradient from the Tools | Brushes menu. After that, change the Angle and Opacity sliders. When you have finished using the gradient, click the button | Change Gradient and then type a custom name to apply it. If you want a specific gradient, click | Insert

New Fill or click | Get New Gradient. The Gradient tool is an excellent tool to retouch or repair damaged images. The Gradient tool, used with a soft-edged brush or pen, is great for smoothing out wrinkles and repairing other elements of an image. Brushes are ideal for creating different effects, such as painting or erasing. The Eraser tool erases unwanted objects. You can use it to delete logos, unwanted writing, and anything else that you want to remove from an image. You can click in the image area and drag the Eraser tool to quickly erase objects. You can also move the Eraser

tool outside of the image, and then click the Eraser tool to erase an object. The Eraser tool can also be used to remove unwanted areas of color and shape from an image. You can also use it to remove items from an image, such as the logo in the example below: To remove an object from an image, drag the Eraser tool over the object you want to remove. The Stamp Tool allows you to create and move a selection around the

image. Using a Path or Lasso Tool, you can create a selection that will allow you to edit parts of an image without accidentally affecting the rest of the image. You can also create selections based on color, shape, size, luminosity, and more. After Effects is another popular video editing software, and the full power of Final Cut Pro X is right at your fingertips. From basic effects like removing red eye, to creating professional-looking titles and animating transitions between images, you can do it all with the power of After Effects. One of the most powerful tools in Photoshop is

the Layer Style. Layers are one of the fundamental components of Photoshop. They act as a barrier between an image and the rest of the program. You can use Layer Styles to create a border around any image or to modify the color of any object or image. Once a layer is created, you can use Layer Styles to change the color of the text on it. The Brush tool allows you to paint on images. You can use the Brush to paint a title, change colors, create a gradient, or anything else that you want on the canvas. Using a Layer Mask you can disable or enable specific parts of an image. This

is useful for cropping images, hiding/enabling elements, adding text or other effects to selected areas. The Gradient tool allows you to create one or more shades of color across an image by drawing a line or gradient. You can create gradients based on hue, brightness or saturation. There are various ways to create different effects with Gradients. You can use the Gradient tool with a single color, multiple colors, a custom gradient, a preset gradient, or a predefined pattern. You can also add color stops to your gradient to adjust its opacity. Using a Layer Mask, you can disable

or enable specific parts of an image. This is useful for cropping images, hiding/enabling elements, adding text or other effects to selected areas. You can even animate Layer Masks. With so many tools and options in Photoshop, it's easy to get overwhelmed. If you want to learn more, pick up a copy of Photoshop Elements or Photoshop CC.
