On the other hand, zooming out is limited to a percentage of the available space. \* Scrolling: The scroll bar that appears during view mode changes shows how much of the whole file you're looking at. \* Selection handling: AutoCAD, e.g. can be selected and moved in both view modes, which is pretty rare in CAD viewers. \* Rotation: The most important feature is rotation, since it allows you to see the content of the drawing from any direction. \* Rectangle: AutoCAD's measured lines or areas can be placed with the mouse. \*
