What's New in the XL Share Board?

Endnote XL is an open-source offline dictionary application for Microsoft Word. It will search through your endnote citations in Word, highlight the corresponding endnote reference in the text, and provide you with a clickable link to the endnote reference. Once you click on the endnote link, you will be sent to a page where you can view the endnote information for that citation. You can also download the cited reference if you wish to save it to your computer. This is great for people who want to save their citations when they're done with the article. Here are some of the features Endnote XL has: - Support for multiple citation types - Support for traditional endnotes and endnote references - Support for endnotes within tables and other tabular items - Support for a variety of styles - Support for multiple languages, including English, French, Italian, German, Spanish, Portuguese, and more! Endnote XL is currently in beta, but you can download the beta and try it out for free. Features: Search through your citations for endnote references Clickable links to all of the corresponding endnote references in your text Online version available for all citation types Full-featured, searchable online version Traditional endnotes and endnotes within tables Multiple language support Endnotes within charts and figures Endnotes within multiline bulleted and numbered lists And more! Installation: - Download the latest version of the installers.zip - Extract the installers - Open the installers\WizTools folder - Choose Install - Choose your OS and click Next - Choose the language you want to install - Choose the location of your install - Read and accept the EULA - Choose Install - Choose a location to install to - When done, double click on the Endnote XL desktop icon to start the application - Start Endnote XL - Click on the "Configure Online" button - Choose "Online Endnote Search" from the first drop-down menu - Click "OK" - Click "Login" - Choose your password, log in, and click "OK" - Click "OK" - Double click on the Endnote XL icon on the Start Menu - Click "Online Endnote Search" - Click "Preferences" - Click "Options" - Click "Preferences" - Choose your preferred Endnote version (8 or 9) - Click "OK" - Click "Preferences" - Click "Search" - Click "Test" - Click "Test" again to make sure everything is working properly - Click "Preferences" - Click "Options" - Click "Preferences" - Choose "Language" from the drop-down menu - Click "OK" - Click "Preferences"
