Therefore, *M. lucifugus* was expected to be able to survive the winter in more variable salinities than the other species. The total number of individuals differed among salinity treatments in July and September, which may indicate that the freshwater crab *O. senex* had a greater ability to compensate low salinities in July and to exploit the salinities in September. At the onset of the autumn, the fresh water *O. senex* populations began to migrate from the coastal areas to the freshwater areas such as rivers and lakes for overwintering (Aplin *et al.*, [ref1]). Aplin *et al.* ([ref1]) reported that total *O. senex* individuals were approximately 17000 per km² in the autumn. The total number of individuals in our study (13816.4 individuals per km²) was similar to that reported by Aplin *et al.* ([ref1]). In contrast, only 1000 individuals of *

What's New in the Talapatram?

Talapatram is a software which allows you to type text directly in your preferred language. This software generates a keyboard which you can type into, and this keyboard will display the text in your preferred language. This type of keyboard is not like the normal keyboard. You will have to use the virtual keyboard for your preferred language and write the english text in any other language which you want to type in. It will convert that english text into that language. This type of keyboard and writing is not a natural way of typing in any language, or writing text in any language. This software gives you an opportunity to type directly in your language, instead of typing in english, and then translating it into your language. The virtual keyboard which comes with this software is very simple to use and does not require any training at all. Simply type in your preferred language, and this software will do the rest of the work for you. Features: Indicates the type of text in any of the languages which can be entered into with the keyboard You can get the keyboard of any Indian language by pressing the "Get Keyboard" button There are additional keyboards included which are of two most popular Indian languages You can select the Indian language from the list of options, when you want to get a keyboard You can choose your preferred font and colors of your keyboard You can change the Font style, Font color, background color and also, the size of the keyboard You can add any combination of the keyboards, if you have more than one You can add the keyboard to the "Favorite list" and can also remove it from the "Favorite list" You can move the keyboard anywhere you want in the window You can add custom buttons to your keyboard and can also move them around You can create customized keyboard with the help of the add-in option You can also "Save As" a keyboard You can also create a shortcut for the keyboard You can also "Copy" and "Paste" keyboard You can also "Save as" the keyboard You can also save all the keyboard layouts in "c:" directory and can import those keyboards into the software again You can also hide the application window and display the keyboard You can also display the keyboard from any window which you are in You can also specify which language and which keyboard you want to use when you type You can also switch between languages of a keyboard using the "Switch" button You can also switch the language from the list of options when you are typing in any other language You can also switch the type of text (from the list of options) when you are typing in any other language You can also type in any other language in any other language and vice versa You can also type in the same keyboard in any other language
