What's New in the?

An application which can download and archive Yahoo Groups messages from your email account directly into your computer. Yarchive does not include any client email client. Yarchive is not actually a client, it is a Yahoo! Groups Archiver. The Yahoo! Groups that Yarchive can read, is limited to only those that you have created an account for. Yahoo! Groups messages which are in your Yarchive group are downloaded and archived onto your hard drive. Instructions: Click on the main menu icon Choose New Group Archive Type in the Yahoo! Groups Group name. Click on Next Click on Next Click on Next Click on Next Click on Create Click on Next Log into your Yahoo! Account Click on your Email address Click on the Group Archive link Click on Next Click on Done Help: * The Yahoo! Groups Group you create should be in the format of: groups.yahoo.com/group/{Groupname} * After you have clicked on Next, your Group Archive account should show in the upper left hand corner. Known bugs: * If the issue is with Yarchive, please email me directly: yaartouch@gmail.com Known issues: * If you try to login to Yahoo Groups using your yahoo account, you will get a generic error message. * If you try to browse or download a group message or document from yahoo groups using your yahoo account, you will get a generic error message. Brief summary: Yarchive creates and archives groups into a temporary folder on your hard drive. Yarchive is set to use the temp folder on your hard drive. Yarchive keeps a history of all the groups that are archived in a.yarchive file on your hard drive. Yarchive saves the history of all the groups to the.yarchive file on your hard drive, each group has a unique name. Yarchive uses the temp folder for temporary storage. Yarchive loads a history from the.yarchive file, if the history folder does not exist, Yarchive creates it. Yarchive moves a history folder to the root of the temp folder. Yarchive makes use of Yarchive API's to access and search the groups that have been archived. Misc Yarchive will open your email account and download and archive Yahoo Groups messages onto your hard drive. You should be using a seperate email account just for use with Yarchive. Remember, Yarchive is not really an
