Over the last few decades, many have been writing on the emergence of an information economy. This is one of the principal factors responsible for the Information Society of the 21st century. The information society will not only provide jobs for the people. It will also turn production line into production chain, the most dramatic change in the history of human civilization. How is it possible? In the beginning, the information society is a world with similar interest and similar beliefs. But as the information society. This document traces the course of the ideology of the information society through four distinct periods, to grasp the evolution of the technology of the information society. Over the last few decades, many have been writing on the emergence of an information economy. This is one of the principal factors responsible for the Information Society of the 21st century. The information society will not only provide jobs for the people. It will also turn production line into production chain, the most dramatic change in the history of human civilization. How is it possible? In the beginning, the information society is a world with similar interest and similar beliefs. But as the information society evolves, it alters the way people think, live, work and the values they hold, not only in their own lives. As the fourdimensional world makes the information of social-economic-environmental-technological, people begin to change their values and opinions. How did the information society develop? The information society started in the late 1960 s. In the early stage of the information society, the development of information technology leads to the emergence of two power centers: the government and the third parties. The government controlled public information channels, leading to the control of information and psychological sense. In addition, the people were affected by the government and forced to take part in the development of society. On the other hand, the third parties, such as media, advertising, and information technology, began to play a role in the power centers, with a huge impact on the state of the people. In the information society, the media took the leading position in modern life. The two-way communication and the information channel caused the possibility of an increase of the market power on information technology. The market power is a factor that introduces a new 82138339de
