

This file contains information that will help you install Age of Empires on yours. Multiplayer requires the following number of discs per player: 2-3. Very important points: 1. The computer manufacturer must support the EA EN version, and if this is not done, then the game will not work on your computer. 2. The size of the disk should be about 16-20 GB. Don't forget to burn the game file to disk. 3. If you have a lot of disk space, but you cannot install AeO on it, then there are other ways: - Download the game using the FLASH disk (boot CD) you got from the store. This is the fastest way. This method requires 4-6 GB of disk space. Be aware that some methods require more than 1 drive, such as a boot CD or CDDVD. There is another way: to pause the installation of Age of Empire for a while. This can be done using the Back Catalog - Demo, BIOS - FAT32 or BIOS - FSH programs. Age of Region is a small .NET project created with a nice interface. It does not require any special programming skills and is easy to install on Windows XP and 7. AgeOffice needs only one powerful computer and a CD to work properly. ----- If you have a Mac, then you will need to install an additional patch for a normal game. [x] -> 1.2.0: Anti-Trojan.Win32.Spybot.inf [1] -> 1 -> 2 -> 3 -> 4: WinAgeOFF [] -> ----- NEW!!! --- Please note that the antivirus may block the installation of the game on your computer. To do this, open the game files in the Ageoffice program in folders with the appropriate names, and not in the root directory of your computer. The program does not conflict with Windows XP SP2 and Windows Vista. You do not need to modify or remove Ageo.exe from the system. This, like any other modifications, can damage the game. § 3. Setting up the game. Changing the screen size
