Programming AutoCAD supports the Visual Basic and Visual C++ programming languages for writing applications. The Visual Basic application programming interface (API) and Microsoft Visual C++ Express Edition add-on are the two available Visual Basic IDE for AutoCAD. AutoCAD 2007 and earlier use a separate add-on named Visual LISP, which supports only Visual LISP. AutoCAD 2009 introduced a language based on Visual C++ called Visual C++.NET, that is implemented with the .NET Framework. AutoCAD 2010 and later support a new programming language based on Visual C++.NET called AutoLISP. AutoLISP was introduced in AutoCAD 2009 with support for AutoLISP v3.1. AutoCAD 2017 provides support for Visual C++ and .NET. AutoCAD has several APIs for accessing objects in the drawing. These include: CAD Application Programming Interface (CAPI) Drawing Object References (DOR) Dynamic Link Libraries (DLLs) Drawing Interfaces (DIs) Object References (ORs) AutoCAD provides interfaces for a number of C++ libraries to access the drawing or to work with external programs. These include: Bridge for AutoLISP Communication Components (Communicator, COM) Microsoft Access Database Engine PowerBuilder CAPI DLLs AutoCAD can be programmed in a number of other programming languages as well. AutoLISP supports programming of AutoCAD as a general-purpose application. Visual C++.NET supports

programming AutoCAD as a component-based application. AutoLISP also supports programming in C# (part of the Microsoft.NET Framework), and Visual Basic is supported for AutoCAD. In addition to ObjectARX, there are other.NET language libraries supporting the AutoCAD ObjectARX API. These are based on the release of AutoCAD for AutoLISP and are available for AutoLISP v3.1, AutoCAD 2016 and 2017. An add-on for Visual C#, a.NET language that compiles to CLR compatible IL, called AutoCAD/IronPython is available for AutoCAD 2016. Plug-ins AutoCAD has a plug-in architecture with API extension methods to enable developers to create their own add-ons. The architecture consists of a plug-in engine that uses COM to communicate with the COM interfaces ca3bfb1094
