While fighting the asteroids in your solar system, you notice something else... People keep dying in regular accidents. They don't stop in the sea, or in heavy rain, but also in places that they can't possibly get in: Some place where you can't access without a specialized spaceship. You can't find the cause because the area is classified. Everybody knows that the sun is changing, but no one knows exactly how. → More Information on how the game works, how the planet is shaped and how the environment reacts ← How to install and build the game ← The game FAQ Please read it carefully. It may help you with how to find certain objects in the game. If you'd like to contact the dev/artist, please make a request at Kaiju Editor is a building game about hunting and breeding giant monsters. You start by creating a portal to different parts of the world. Then you can build a base, or invite other players to build for you. Others can join your game, and it can change to different maps/biomes. There are two modes: you can play alone, or you can play with friends. Kaiju Editor also contains a story and a campaign in progress, with several map/biome types and several monster creatures. The game star is you. You are a space cadet that has been ejected from Earth for a crime you do not remember committing. You awaken on a strange world inhabited by a dangerous alien race. To survive, you must fight for your life and fight to discover what happened to you and to your home planet. As you explore your surroundings you will learn new technologies, meet new friends and enemies, and eventually discover the secrets of your own past. But beware: it will be a journey unlike any other, because with every step you make, you have the power to rewrite the fate of a whole new galaxy. You play as Ethan, but you can choose to control a second character as well. To switch to a second character, simply press Ctrl + F2 Game Features: Choose your own adventure! How your story will unfold is entirely up to you. Will you help allies and destroy enemies? Will you betray them and take over their positions? What will you decide? **How To Crack:**

- World tourism is accurate and in good shape, maximize your profits: Tourism boost (available after completing settlement module - see more below).
- Croatia, Serbia, Bosnia, and Bulgaria can be taken over, because they are not yet technically free, but they will give you an aim to conquer them.
- For 2.0, before the start of the game, a path will open to Morocco. This is a place where you can find it's golden age. You can take over Morocco, which will improve your unrest in the south easier.
- My recommendation is to not start a game that is more than a '4 kings rule'. The game is not as addictive as in the past and it's not easy. I would recommend to start it with the 'pick and export settlement.'
