A lot of it has to do with the way that FIFA 17 was, basically, a linear, textbook-based version of the sport. If you had a perfect player rating, you could basically do whatever you wanted. If I was a bad player who could do everything but still had really good fitness, I could play every match like it was a train wreck. Unfortunately, the reality is that most players don't have that kind of athleticism and it comes down to the game being hard to play for a lot of people. It's been a year since I've played a FIFA game. What's it been like going back? I know this is going to sound stupid, but it feels like it's been 25 years since I've played FIFA. You know what I mean? It's been quite a while since you've had to go through such a major evolution in the way that the game is played. The last FIFA I played was FIFA 09, and I think there were actually more changes in that game than FIFA 17, but in reality, it doesn't feel like it. There's been a lot of incremental changes, but it feels like a big game.

Absolutely. I think I've played like 25 or 30 games of FIFA since FIFA 09. You've been playing around with FIFA for so long now, what comes first? Obviously, I don't get to pick what game comes out first, but it really has to be FIFA. When I'm playing, I can't help thinking about what's going to be next. If I wasn't playing it, I'd be thinking about it. So I kind of hope there's more to come. "Let's just say there are loads of developers out there and quite a few more ideas being thrown around now." Who are some of the people you've enjoyed playing with on FIFA? The people I've liked playing with the most, and I think a lot of this is due to the writing, is KSI [Karim ben Khalfallah]. When he's playing, he's fantastic. He's one of the most competent players I've ever played with and he's always going to be around
