
Fifa 22 (April-2022)

FIFA 22: Players will now be able to produce new animations by changing their actions, interacting with the ball and controlling the flow of the game. For example, players will be able to change the ball trajectory and achieve higher speeds by punching the ball higher into the air, allowing for shots with more velocity and precision. FIFA 22 also introduces a new Cover Art feature that will display a player's unique shirt on the cover of the game. Coaches' Team of the Year for the first time, the "Team of the Year" statistic will display results based on tactics and innovations used by the coach rather than just individual player attributes. FIFA 22 also brings players closer to their opponents by introducing a new ball physics system and unique differences in player attributes depending on their team, regardless of nationality. Players will also be able to improve their ball control and shooting accuracy by engaging in post-match player ratings or unlocking bonus features.
