This is the first FIFA title to use all-new, raw-motion-capture data; it's the first game to use only these types of data and not rely on standard Player Impact Model calculations used in previous versions. "HyperMotion Technology" brings a new level of raw, physical gameplay simulation to the EA SPORTS FIFA franchise. The goal is to deliver realistic player movement, ball contacts and player collision, all with the goal of enhancing the FIFA experience in many ways. "We are bringing the power of real-life player movements into FIFA," said Mark Pacini, Senior Producer at EA Canada. "The technology will be a cornerstone of FIFA 22, and we're excited to share it with the world." FIFA 22's final game mode, the Career Kick-Off mode, is also powered by the new "HyperMotion Technology." In Career Kick-Off mode, players are encouraged to "kick off" their career with a number of different game modes like league, cup or knockout matches. The Career Kick-Off tutorial also takes the new technology to the next level with 25 unique quick-start challenges that draw on the athleticism of real-life players. "The new Career Kick-Off mode gives players new opportunities to live out their pro dreams," said Christian Canard, Head of FIFA Development at EA Sports. "With the new technology, we're giving players the tools to 'kick off' their careers the right way." FIFA 22 is heading to PS4, Xbox One and PC on November 18. EA SPORTS FIFA 18 and FIFA 18 Ultimate Team will be compatible with "HyperMotion Technology." FIFA Ultimate Team players also can play with the new data now in-game using "Person Impact Visuals" to see which players really make the most of the "HyperMotion Technology." FIFA 22 : Begin Your Career As A Professional Footballer There are five new Career modes exclusive to "HyperMotion Technology" at launch. These game modes are a new way for players to kick-start their professional career in FIFA. You can find out more about these modes here. FIFA Career Kick-Off Mode Get ready for your pro season with Career Kick-Off mode. In this mode, players start their careers in Europe and
