In another study, reduced thickness of the TBLM was reported in patients with OCD, but not in patients with MCAS

\[@B48-jcm-01-00065\]. Interestingly, patients with major depressive disorder (MDD) showed reduced TBLM thicknesses of the left inferior parietal lobule \[@B37-jcm-01-00065\]. A large sample study found that the thicknesses of the orbitofrontal cortex, insula, anterior cingulate, dorsomedial prefrontal, and the left amygdala were significantly thicker in those with ASD than in their respective controls \[@B25-jcm-01-00065\]. A recent study also found that the thicknesses of the right subgenual anterior
