The Chronicle of the Copper Crown is a collection of 3 adventures and a great deal of handouts, that teaches you how to use the settings of Symbaroum without resorting

to traditional travelling and fighting-oriented adventures. We included these in-game tools for you to use in your own campaigns, regardless of your gaming framework. The first adventure, *The Mark of the Beast*, deals with different kinds of problem-solving and introduces the players to the town of Thistle Hold. And in the second adventure, *Tomb of Dying Dreams*, the Game Master gets an example on how to design a so called adventure landscape, while the players finally get to venture out in the vast Davokar Forest. *The Chronicle of the Copper Crown* includes: 7 mystical artifacts A handful of color maps to explore A dozen handouts of letters, notes and map sketches More than 20 NPCs and creatures New rules in the form of rituals, traits and elixirs And much more to add.

The Mark of the Beast: Location: Thistle Hold, Davokar Forest. Players: 2-4. Game Master: 2+ This adventure follows the survivors of a shipwreck drifting through the foggy waters of the Davokar Forest. They are found by a group of explorers searching the

interior of the forest, and they decide to return to the coast, where they hope to receive help to continue on their way. But the party soon discovers that they have wandered quite far from the coast, and that help doesn't seem to be forthcoming. Things only get worse when a storm hits the area, and it quickly becomes clear that they are not just lost, they are also cut off and have a long way to go before they will be able to reach civilization. Your heroes must fight, sneak and do all sorts of crazy things, to survive. About This Adventure: This is a short exploratory adventure, meant to be the introduction to the game. It includes a plot that is fully resolved in 3 or 4 sessions of play, as well as a post-game document that provides you with a lot of information to use in your own campaigns. Converted by: Pixeldiet Released on July 15, 2019. Designed for Fantasy Grounds version 3.3.7 and higher. Requires: An active subscription or a one time purchase of a Fantasy Grounds Full or Ultimate license and a one time

purchase of the Symbaroum ruleset. Tomb

If you like the latest fright flicks or are a fan of H.P. Lovecraft (they are unrelated), then you will definitely enjoy this game. Horror House is an interesting story concept with a unique twist, that the game is all about interacting with the game objects and listening for sounds while also looking for clues to progress your adventure. You have 3 ghouls that follow simple rules to prevent you from progressing - you must prevent them from following you from room to room, and you must be the first to find a key to escape your home before a monster is upon you. To do this, you can do a simple detection; when a ghoul appears, open your eyes wide and make a sound to communicate that you're not where a ghoul is (if you are, they'll run back to their designated location). Or you can use another ghoul that has a special ability, like the fly ghoul that you can catch and fly on your shoulder (or a turret gun ghoul that can shoot deadly darts). Horror House has three

unique ghouls with their own properties, each with their own mechanics, and the level design favors exploration to figure out how you can escape each room. There are many different locations to explore, and all the rooms are creepy and dark, with different sounds and objects to find. But the real challenge comes from how the sounds and locations of rooms, enemies and objects shift and play depending on your actions. (Note: Due to moral licenses, themes, and graphic violence, the game is available on Steam, but please be aware that the game's full graphic and content may not be appropriate for children.) ***** If you are interested in Horror House or looking for info on our content, please contact us at info@the-spade-family.com. ==
