# [Download](#)

Now on 3rd of April, a small band of Reavers roam the dark city at night. With no purpose and no defence, their only protection is a group of trusted close to each other friends. But all hope is not lost. For your very survival depends on your ability to find the right and right number of panels of 2048 and then more importantly, you need to get back to the right panel within the right amount of time - either you'll be tried to be devoured or you'll be saved. Your only defense is your comrades, with the help of the surviving panels you could save your life and it is up to you. Robothygam3k's ReaverProject is a pay what you want game. Currently there is an active campaign of donations and there will be

more if the project will become popular, while you don't need to donate, you can support us by simply using our game on your devices in the form of in-game credits. Credits: How to find your vikings: If you are planning to play the game on mobile devices, there are two ways: 1. Put your handsets in the places where you can see the man holding a shield on the top image. 2. When you reach the north. There is a village with 11 people sitting around a fire. Go directly in the direction of the fire and follow the north arrow. You will see the villagers and a man who has a shield. For mobile players the man with a shield is the possible target where the game will be played. If you are planning to play 2048 on your PC, on this stage of gameplay, you may want to stand in the center of the large map. A soldier nearby should have a shield, and you can check what is on the right panel below. If you are able to see the man with a shield, then the game is in the correct location.
