, part two Schisma - My Knights from Beyond the Grave, part one Zenius In February 2009, a free magazine, Chopped [totalinsider] titled a double-issue of cover stories about the development of Foul Play 2.0. During the development of Foul Play (1989–2004) and Foul Play 2.0 (since 2004), many activities took place which did not appear in the game nor in the manual - which has been rewritten about 2 years before release. Through his blog, the designer Morten Jorgensen continuously published information and photographs about his activities. Publisher and sales The DK2 version of Foul Play for the German market was published by Official Jugendschutz Software (OJS) and under license of Telebrands. After OJS' bankruptcy, the rights to the game were acquired in part by Telebrands' sister company Makina und Machineholding GmbH, a German company well-known for its paintball products. The German version of the game was not withdrawn from the market. It was, as of 2009, still available for pre-ordering in a few special stores and was released on the additional game CD "Foul Play 2.0 - DK2 vergriffene Mauern" by "DK-Com", a German compression service, on Wednesday, May 8, 2009. A DVD version was never released by OJS. The German version was released in 2009/2010 as brand new game, was now sold for the market by publisher Makina und Machineholding GmbH, unlike the previous ad hoc and critically acclaimed re-release of DK1 that was offered as a bonus from the original DVD box. After release it became clear, that sufficient demand for the game had not developed and that the distribution and sales of Foul Play 2.0 in the German market was a failure. For this reason, the publisher decided to stop producing the game and gave its brand rights to another company.
