adventure game! Many of these rumors are false, and it seems like he is just some guy that is so incredibly popular that the administrator of an online game wanted to give him the chance to make some good games. He couldn't be more wrong. Every time I try to contact him I get some non-reply message saying that my message was just delivered in his spam folder. Strange, huh? Maybe he needs another try in a couple of hours, but I doubt it. Anyway, let's see if he will just send me a black bar message. Like my Facebook: Don't let Santa's naughty list get out of control! It's the Christmas holidays and the reindeer are all taking naps. It's up to you to help Santa find the naughty children before they make it to his good list. In this Santa vs. Zombies game, you'll need to collect snow globes, present boxes, fire balloons, and

a bunch of other items in order to keep those naughty little angels in check. You'll need to fly around the world on your Santa sleigh, shoot tons of candy canes, and go through several Christmas-themed levels. It's the most dangerous time of the year, and you've got to get there first! After the first three levels, Santa's sleigh can be upgraded twice; this allows you to buy more presents, fire balloons, and candy canes. If you are having trouble getting past certain levels, you can always buy upgrades from the store that appear along

Awesome game, and one of the better VR games out there. It took me a while to get used to the controls and move speed but once I did everything was right where you want it to be. The wide open gyroscope I feel allowed me to perfect use of the movement. Very fun!

OVERVIEW Review Graphics: This is probably the most graphics demanding game that I have ever played in VR. The cars look really cool. You can get a car to look really special by getting a special paint job. The cars do look like the real deal when you watch them on TV. However, you really have to have some PC power to play this game. Gameplay: There are a lot of racing games, but there are very few arcade style racing games. This game lets you spin, smoke, and wreck your opponents before you hit their backside. You also have a

## What's new in VGL: Imperative:

**2 I Love You, Colonel Sanders! A Finger Lickin' Good Dating Simulator 2 is a mildly awful survival horror game in which you're the Colonel. The colonel's gotten himself mixed up in solving his wife's murder, who happens to be a cat. The cat is plotting to turn the couple's house into a fast-food restaurant named Colonel's KFC. You (that'd be you) grow attached to some of the house's residents: the wife's ghost, some of the ghosts from Col. Sanders' past, some chickens, and some cats. All in all, it's a terribly dark game. A game I wouldn't recommend you play, after getting through the first hour. Unfortunately, in A Finger Lickin' Good Dating Simulator (first released a year ago), I already reported about this poor baby. It was the most disappointing game of the year, with a dull cast of characters and art. According to the Internet, people really liked it. On Steam, it racked up nearly 50,000 negative reviews in the first three months. I'm reluctant to play it again. It's like bad news in a news cycle. I don't want to bemoan it in public; you don't want to see my review. So I'll just say it's a miracle that this. A Finger Lickin' Good Dating Simulator 2's open world technically is the same, though it's about a third larger. It still plays like a maze that you have to navigate, but I can't quite tell you what it feels like. I get up and I go through doors, maybe it goes over a hill and then through another door. I think, and then I can't be sure if that happened. It's like my eyes are on some sort of VR rig. I can't always tell the difference between a real object and one that's a duplicate. That, and the camera has terrible jitter problems, like I got in there and suddenly I'm surrounded by wall, and then the wall disappears into thin air. Despite the caustic details, the game comes along with the cartoony art we've grown to love from this genre. Again it's cute; it doesn't come across as generic; it has some**
