What's in this version : • Awards Version 5.0

(2015-04-06) Review by a I'll admit it - I use the internet to navigate through life. I read, I watch videos, I use the Wikipedia app. This app brought that to a whole new level. I was able to input customers, company, shipment, and almost anything. The features were impressive and the layout was good. Covers your basic needs: General - basic input functionality - customize your invoice(s) according to your business needs - add notes to your

customers - edit the appearance of your invoice(s) - add an "invoice via email" feature - keep track of your invoice's status - you can find your customers via their email address - export the invoices Billing and Invoicing - add sales tax - create/edit your company - adjust the prices of your products - add discounts - keep track of your merchandise inventory - add products - create/edit your company's address - adjust the company size - keep track of your

customers Online Store Management - add products to your online store - keep track of your online store's inventory - manage payment methods - adjust your shipping prices - manage the shipping packages - keep track of your online store's payment methods - keep track of your online store's payments Reporting - automatically generate invoices and reports on your b7e8fdf5c8
