## **Windows XP Service Pack 3 Crack +**

**What's New in the?**

---

## System Requirements:

Your graphics card must be able to run the game, but it won't be at maximum performance. Even in DX11 mode it will still run at a playable frame rate and is able to cope with some of the elements that appear in the game. The game requires DX9 or DX11 to run, but it will run at native 1080p with DX10/11 even on Windows XP. On PC, 1 GB of RAM is recommended. The game requires at least 3GB of hard drive space, but a minimum of 5GB is strongly recommended.
