AutoCAD Crack + For Windows

As of January 2020, AutoCAD Crack Keygen is available on macOS, Windows, and Linux. Contents show] History The early history of AutoCAD For Windows 10 Crack began on an IBM 3085 with a trio of CP/M OSs (DOS, Times-8 and OS/2) running a low-level application known as PL/1. The development of PL/1 was led by Donald Davies. Davies considered the IBM 3085 to be an ideal workstation platform for PL/1, because of its 32-bit word size and its extensive hardware support for user-level operating systems. Although 3085s were plentiful at the time, they were not cheap, costing roughly \$5000-8000 in 1982. PL/1 was written to be an application development system, and was aimed at the CP/M industry, with the eventual goal of running on a wide variety of hardware platforms. Although it used C as the underlying language, PL/1 was not intended to be a real-time operating system. After a year of work, PL/1 was put into production and sold to companies such as Cray, Digital Equipment Corporation (DEC), Hitachi, NEC, Tandem Computers, and Unisys. Early versions of AutoCAD Full Crack were written in C and PL/1, and an object-oriented programming language was added in 1985. In 1986, a new system was developed for the Apple Macintosh using the Objective C language, which was well suited to its object-

oriented programming model. The Windows platform was introduced in 1987 with version 1.0 of AutoCAD Cracked Version, and the Linux platform in 1989 with version 1.1. In 1992, the X Window System was introduced, allowing AutoCAD Crack Keygen to be distributed via CD-ROM and the Internet. In 1993, PL/1 support was removed from AutoCAD, and from 1994 PL/1 was dropped as an operating system. Timeline 1982 November Bill Gates and Paul Allen introduce DOS 6.2 to PCs in October. 1982 December IBM introduces the first IBM Personal Computer to the public in January. 1982 December IBM introduces a retail package for DOS 6.2 in January. 1982 January Microsoft begins selling PC versions of Microsoft BASIC 1.0 in January. 1982 January DEC introduces its PDP-11/70 in January. 1982 February
