“INCREDIBLY FUN! LIKE BOTH GAP SHOOTERS AND SF SHOOTERS! ” “No more waiting for sequels to arrive!” About Cryptark: “Become the ultimate underground hunter with your gun shaped like a key, and kill all enemies in your path!” “A game that exists in its own right, its not just another clone, it has its own universe, its own feel, its own characters, and it’s own setting.” “A game that’s big, but easy, and a ton of fun to play.” About the Gameplay: You are sent to an interstellar dimension to uncover the secrets of this hostile new world where humans have evolved. Monsters and bandits are out to steal your shipload of rare crystals, forcing you to use all of your careful planning and tactics as you fight your way to the top of the criminal underworld. About the Graphics: The visuals in Cryptark look great and maintain an appealing style that is very fitting to the genre. About the Sound: The sound in Cryptark is equally great as the visuals; it’s a simple music and sound design, however, which lends to a nice contrast in the game’s overall feel. The soundtrack gives you a firm impression of being in a futuristic space shooting environment. About the Game Balance: It’s very good in terms of creating an encounter that’s challenging, but not unfair. You will encounter a variety of enemy types ranging from humanoid to large massive creatures, and the difficulty of bosses and the end-game levels are appropriate. About the Game Fun Factor: Cryptark has that delightful, addictive gameplay that you just keep on playing, which is made even better with the excitement you will feel when you win the game and find the Alien Gear (the flying saucer), or find the new lasers and stuff! About the Replay Value: Cryptark will have a ton of replay value, not only for the entire campaign, but even after the campaign is over, with the randomly generated levels that you
