"The Sea of Marle. A land of turmoil and injustice, with pirates terrorizing the seas, every sailor in the world looking for a home. The very air, as stormy and turbulent as the sea. Anything can happen in this sea of trouble. Everything can change with one throw of the dice! It's the wind of fortune, the wind of luck."Marle: The Pirate Capital - Five Buccaneers - Baloo

And The Five Buccaneers "The Five Buccaneers are the best pirate crew you could ever meet. We sail in an open sea, open for anyone willing to join us in our battles against the many. The same deep sea that drowned The Flying Dutchman, or our homes on land, the Old States of Europe, but we have left them in our past, nothing to do with us. We are a new pirate crew, working for ourselves. And we're having a good time doing it!"Q: PHP findLastIndex when in a loop I have the following loop: while(\$row = \$db->fetch(\$id)) { //process \$row and insert into DB } //process the DB and store the results

".findLastIndex(\$r->getText(), 1, strlen(\$r->getText()))"; } When I run this, I get the first result fine, but it spits out this error at the end: Notice: Array to string conversion in C:\xampp\htdocs\CVS\search.php on line 19 Where it looks like it's searching for a string rather than the index of it in the array. As I'm sure I'm probably missing something simple, I'm

having difficulty solving this. A: The first index
