AutoCAD was introduced to users of AutoLISP in AutoCAD 2.0, released on November 7, 1992, and was implemented as a commercial product by the end of 1993. It would be nearly two years before AutoCAD 2.5, released on July 1, 1995, would include a built-in, object-oriented version of AutoLISP, then known as ObjectARX, which would be the base of the ObjectARX API for AutoCAD 2.5 and later versions. AutoCAD 2.5 also introduced another fundamental change in AutoCAD programming in that a core code library was no longer necessary to access AutoCAD objects. AutoCAD 2007 and earlier AutoCAD 2007 and earlier had the ability to attach to other applications, including Microsoft Excel, Microsoft PowerPoint, Microsoft Project and Microsoft Access. These integration and interoperability features were never fully developed in AutoCAD 2007 or earlier, and were not incorporated into the later version of the product. AutoCAD 2009 AutoCAD 2009 (AutoCAD LT 2009) was released on January 25, 2009, introducing a new user interface, a new command line, new features and new scripting capability.
