The Slaughter - Act One is an arena centered physics based twin stick shooter set in a post-apocalyptic environment. Players inhabit state of the art Drones that can be customized and equipped with all kinds of different weapons. Physically destructible environments and unique enemy drones make each game unique. About the Team Loser Media is a small independent development team made up of a cast of committed and inspired developers, as well as an engaged player base. The team is comprised of experienced and dedicated people, such as the community leader, a writer for Classic Arcade Gamer and 10 other passionate developers, each striving for the same high quality in their individual work. ... Retrograde Arena is a first person shooter for PC. A dual stick shooter with real bullet physics, also featuring multiplayer, customizations and a unique arena based game mode that will be released in the near future. Description from Steam Retrograde Arena Retrograde Arena is a first-person shooter game. It is a multiplayer game. While it was originally described to be a retrovirus shooter and has the virus retrograde in the name, the developers clarified that it is not a retrovirus shooter. Contents Each player is a Drone with unique weapons and a customizable set of attributes. The game mode is based on a symmetrical arena where the players must eliminate the other players and keep alive at least one other player to win. In Supersizer mode, all players start with a bomb and have to eliminate opponents, while the only player left alive wins the crown. The game has online multiplayer, local multiplayer and single-player modes. The online multiplayer allows players to play on many different configurations, such as 1v4, 3v3 and 5v5. Currently there are 6 different game modes and they are Daily Propose, Supersizer, Last Drone Standing, King of the Crown, Trial and Bomb. The game also features local multiplayer and a customizability mode. The game has a twitch meter which is used to feed back information on the currently active players, difficulty to slow down in multiplayer, and the amount of players in a team. The game has voxel based environments, day-night cycles and rain. Weather is an important factor to consider. If a player is physically exposed to bad weather, he might be wet or sweat, so poor balance is added to the game. The drone has two thrusters that

**What's new in Nobody - The Turnaround:**

1040! I bring you fresh from the main competitors! This is our in-house built Counter Strike: Global Offensive client, coded by myself and Askild from Team11! So I'll never be misunderstood. Setup! To ensure a comfortable setup, it is recommended to create two accounts: one in Team11 and another in the Null-X client. Please note that after starting the Null-X client, verify the account status by pressing (R) and observe the informational window. Please be mindful! Setup Anticheat! The null-x client detects at game start whether the anticheat system is enabled or not. If the anticheat system is disabled, the null-x client will exit the game automatically. - Anticheat is a tool that determines if the anti-cheat code disables certain operations of your computer. In the following case, anticheat system cannot be detected due to security reasons. Make sure that the anticheat system is disabled and you are using a new or freshly patched version of Team11 client - Lately many newer and more private game companies and developers have been actively hunting down anticheat tricks and developed the anticheat system themselves which renders the anti-cheat software useless for all versions. Cheat Menu! The null-x client will allow you to cheat, just to steal some points. What, is that wrong? It is actually the main purpose of a game where everyone tries the best of his own abilities to get the highest score! On the contrary the purpose of the game is to get your opponents' score. Cheat Menu users can use this cheat function until the official release. Game options! Please note that this is live and there might be some changes coming. Again, if that is the case, get used to it in the meantime - they are here, when you need them ;- ) Select a map (the current default one!) and press the start button! Full disclaimer, I am not responsible for your actions! Usually, due to this you'll lose your opponent and the game will be restarted. (Designed this that way.) Recover mouse and keyboard inputs! Leave this as this, then it will continue to work all the time. If you wish to remap the hotkeys you can do so in our manu-map! Disable crash detection
