Neural degeneration of the tractus septohippocampalis in the cat. II. Comparison of the cell density and cell morphology of the hippocampal formation in aged and young cats. The present study deals with the morphological changes of the hippocampal formation associated with the

alteration of the dentate gyrus. Two series of 5 cats each were submitted to the same experimental conditions in order to compare the cell density and cell morphology in the CA1-CA3 pyramidal fields of the hippocampus and the polymorphic part of the dentate gyrus. Two other groups of age-matched cats were kept under similar experimental conditions as the previous one, but were sedated with alpha-chloralose (3-4 mg/kg b.w.) which was intubated by a Frova catheter. This solution was infused during 50 min and the animals were killed 2 and 24 h after the beginning of the infusion. A 10 microm thick coronal section was stained with cresyl violet and processed by computer assisted morphometry. The cell density was significantly increased after the alpha-chloralose infusion in the CA1 and CA3 pyramidal fields but not in the dentate gyrus. No age-related changes of the cell density or of the cell morphology were observed. The morphological changes consisted in a thickening of the infragranular cell layer in the CA1 and the hilus of the dentate gyrus, with some nuclear abnormalities in the latter. After the brain death, the cell density was similar to that of the 2 h old group, but the interneurons exhibited an increased size. Moreover, the cytop

Importance of the Semantic Web. Implementing Semantic Web. Management of Web. (SemWeb) Use Cases. About the Author. Frequent contributors. Siemens Category: Telecom systems Category: Telecommunications infrastructureQ: Get all records in a date range I have two date ranges, {from|to} and {start|end} and I want all records within the ranges. It would be most useful if this would work for multiple ranges too. Below is the sql code I have come up with. I am sure the sub queries can be improved. SELECT * FROM exampleTable WHERE year(start) BETWEEN year(from) AND year(to) and month(start) BETWEEN month(from) AND month(to); SELECT * FROM exampleTable WHERE start >= 'from' and start = 'from' and end = 'from' and start = 'to'; SELECT * FROM exampleTable WHERE start >= 'from' and start = 'from' and end = 'from' and start = 'from' and end = 'from' and start = 'to'; SELECT * FROM exampleTable WHERE start >='from' and start = 'to'; SELECT * FROM exampleTable WHERE start >='from' and start = 'from' and end = 'from' and start = 'from' and end = 'from' and start = 'from' and end >= 'to'; SELECT * FROM exampleTable WHERE start >= 'from' and start = 'from' and end = 'from' and start
