Q: rails 3.1 live validations, what am I missing? This is a bit of a weird question but I'm coming across a weird issue I can't seem to resolve. I have a website using ruby 1.8.7 (2009-06-12 patchlevel 174) [x86_64-linux], and deployed under ubuntu 8.04 LTS on ec2. I'm using rails 3.1, and my update-code runs fine (all is deployed ok) On the server I'm testing live updates on a feature i'm developing. I've activated rails 3.1 activerecord-validations. I updated my rake task which runs on update for validations: validate :run_validations
