The Elder Scrolls Online is a massively multiplayer online game set in the worlds of Tamriel and Elsweyr, with optional online player-versus-player (PvP) combat. Featuring a deep, persistent world, player-driven content, multiple class and race options, and the freedom to play your own way, the Elder Scrolls Online was developed by Bethesda Game Studios, the award-winning creators of The Elder Scrolls® franchise.

ABOUT THE LAUNCHER GAME A brand new fantasy action RPG set in the Lands Between. Witness the fall of a once-great nation, the birth of a hero, the rise of the Elden Ring 2022 Crack, and the discovery of a world long thought lost.

Elden: Royal Edition features:

- **Chronicles of the Elden Ring:** Get a glimpse of the life and times of an ancient order of heroes who lived long ago.
- **Mount & Blade: Warband:** Assemble an army and lead your fighters to victory in a lively battle arena.
- **Tides of Numeria:** Experience the troubled history and rise to power of the Nemean lion.
- **Post-Launch Content:** The new adventure will continue to expand the Lands Between after the game's release.
- **Online Play and PVP combat:** Complement the game with a rich online experience that allows you to directly connect with other players and travel together to distant locations and fight other players in the game's expansive world.

1. Field of the Invention The present invention relates to a slant beam scanning optical system which is used in an image reading apparatus for reading a document, such as an overhead projector (OHP), a fax machine, a copy machine, an image scanner, a flatbed scanner, etc. More particularly, the invention relates to a contact type image sensor which is used as an image sensor in a contact type image reading apparatus in which a line sensor is fixedly provided at the outermost surface of a reading surface of the apparatus for reading an image by moving the reading surface along with the document surface.

2. Related Background Art A contact image sensor (CIS) is used as an image sensor in a contact type image reading apparatus in which a surface of a document is illuminated by reading light rays (hereinafter referred to as scanning light rays) irradiated from a light source such as a laser beam source while a reading surface is moved in an oblique direction with respect to the incident direction of the reading light rays to scan the document
