Step 7: Please enter your serial number on the following page: How to debug vb6 dll exported from.net app? I have a.Net app that calls a vb6 dll. On our development server it's working great, but on the servers that are being

---

used by our clients the call fails. From the logs we've been getting, looks like the same error from the vb6 side, but with more details. I want to be able to put a breakpoint on the vb6 side to see why this is happening. My question is: Is there a way to debug the vb6 dll from the .Net app? The way that I can see from the log that I'm getting from the .Net app is this:

System.Reflection.TargetInvocationException:
