## Descargar Solucionario De Introduccion A La Robotica 3ra Edicion De John J Craig

A: Using the paperclip Gem (which is what I think your referring to in your question) the solution would be: `class post "person" has_attached_file :image, :styles => { :medium => "350x350", :thumb => "100x100#", :large => "500x500#" }, :default_url => "/images/:style/missing.png"` The above is what I think you are looking for. I also added to your model the `has_attached_file :image, :styles => { :large => "500x500#" }` to allow for a large logo which isn't exactly "medium". (I didn't go into specifics about the styles as I'm not exactly certain what the requirements are.) Additionally, I believe you want to use the `default_url` for the thumbnail, not the medium. I suggest looking into the Paperclip Gem. It makes uploading images to your app a piece of cake. It has a long list of additional options as well.

Q: How to get round corner touch event in UITableView? In my application, I need to get round corner touch event in UITableViewCell. I am able to get corner touch event in UITableView.

```
UIImageView *imageView = [[UIImageView alloc] initWithFrame:CGRectMake(54, 18, 217, 142)]; imageView.image = [UIImage imageNamed:@"delete.png"]; [cell.contentView addSubview:imageView];  
UIView *roundView = [[UIView alloc] initWithFrame:CGRectMake(79, 9, 130, 130)]; roundView.backgroundColor = [UIColor colorWithRed:33.0/255.0 green:33.0/255.0 blue:33.0/255.0 alpha:1.0]; [cell.contentView addSubview:roundView];  
roundView.layer.cornerRadius = 3.0; - (void)touchesBegan:(NSSet *)touches withEvent:(UIEvent *)
```
