I've seen suggestions for this online, but none seem to be doing exactly what I need. I have a string as follows: "Some text123 Some text 456 Some text,4567 Some text" I want it to look like this: "Some text123 Some text 456 Some text,4567 Some text" The thing is, sometimes it comes as follows, with a large number of spaces at the beginning of the string: " Some text123 Some text 456 Some text,4567 Some text" How can I use a replace function to do this? A: You can use the function preg_replace. Take a look at it's documentation: Example: preg_replace('/\s+/', " ", \$string); In your case, it should be something like this: preg_replace('/\s+/', " ", \$string); // Copyright (c).NET Foundation.
