tuba no tapós is a retired 16th-century portuguese franciscan friar and scholar. he is one of the most prolific writers on music and music theory of the 15th century. his work was designed to replace the notation that had been used in the past, and to restore the lost musicality of the chants. his work was published in 1524 and 1539, and eventually, after his death, his treatise on notation was printed in 1570, under the title "musica et arte notarum", or "music and the art of notation". the first volume of this work was written in 1525, the last one in 1539. however, the "treatise on notation" is not a sequel to the "psalterium", but rather a separate work, as the musical notation that appeared in it was never used in the "psalterium", nor was it ever intended to replace it. still, the treatise has been called the "psalterium cum notis", or "psalterium with notation". however, this was a book of two volumes, the second of which was lost, and only the first volume was printed. the second volume was lost for nearly 200 years. the first volume was printed in 1570. the latin language used in the treatise was based on the chanson, a formal poetic composition of the late middle ages, and therefore very different from the latin used in the "psalterium". this treatise on notation was the first attempt to create a musical score with a separate alphabet, in order to preserve the melody. it is also the first treatise in which the rhythm of the chant is preserved, as well as the duration of the notes. this treatise, which by then was considered to be definitive, was called "treatise on notation". it was a great success, and was an important document in the development of musical notation. through the treatise, the first written score of a chant appeared. this treatise also contains the first usage of the treble and bass clefs, with which the musical notation of the treatise became standard. the treatise was extremely influential, and it determined the development of musical notation in europe. the original latin text of the treatise is included in this torrent, as well as the.srt subtitle and the.avi video files. it is also possible to download a latin-to-english translation of the treatise. this treatise is also available in other languages, including japanese, portuguese, spanish, german, and italian.
