
I Doser 172 Doses

additional doses will be delivered to countries identified with covid-19 risk and need, and will be supplemented by additional doses purchased directly by gavi on their behalf. through these mechanisms, target populations will be assured of adequate supply of vaccine. if a pandemic were to happen, the gavi facility would rapidly dispense vaccine globally to ensure that adequate supplies of vaccines reach those who need them. the covax facility, will be able to capture vaccine in the countries that need it most by ensuring that it is available throughout the countries most vulnerable. for covax to be most effective, vaccine manufacturers will be incentivised to invest in manufacturing capacity, and health workers will receive training in safe handling and administration of new covid-19 vaccines. only with this combined effort will we be able to stem the tide of this pandemic. covax seeks to find safe and effective vaccines against existing and new infectious diseases for priority groups such as children and adults, health workers and other groups targeted for vaccination, and in developing countries with vulnerable populations. gavi is the vaccine alliance's public-private partnership, which is dedicated to boosting the world's immunisation programmes. these programmes save thousands of lives each year and reduce health-care costs as babies, children and adults continue to grow up protected against sickness and death. gavi is working with partners worldwide to provide access to the essential vaccines that we know will save lives. an estimated 12 million children and 4.7 million adults will die from vaccine-preventable diseases without access to vaccines, including between 200,000 and 400,000 people with hiv and less than 100 children per year in sub-saharan africa with measles.
