this expansion, for some reason, is called medal of honor allied assault breakthrough. it adds a new mode in which you play as a us infantryman and a variety of missions that explore the us and german infantry war. it also has new weapons like the m60 and the m41 sniper rifle. on the multiplayer side of things, it adds in the new resistance mechanic, which brings in 6 new weapons (including the sterling smg), 3 vehicles, and some new maps. the expansion also has a new character who follows a similar storyline to the french resistance character from the first game, manon batiste. the popular computer game, medal of honor: allied assault was one of the few games that featured a single-player campaign in world war ii. after its initial release on october 28, 2002, it was immensely successful. a sequel, medal of honor: allied assault 2, was released in 2006, but it was a bit of a different story. instead of being developed by a team from ea canada, allied assault 2 was developed by the ea los angeles team. although the game looked great and was fun, many gamers felt that the single-player campaign in allied assault 2 was inferior to the one in its predecessor. the next step is an open-ended, free-roaming first-person shooter game called medal of honor allied assault spearhead. it allows players to lead a squad of us soldiers on a series of missions in world war ii. this is the third of the five expansion packs for medal of honor: allied assault. it was released on september 3, 2006. (this is not to be confused with the expansion pack called spearhead, which was released on december 4, 2006, as a free download)
