the basis for dungeon defenders is called etheria, and it lies somewhere between the medieval fantasy world of skyrim and the sci-fi future of dungeon keeper. the game is set on a world inhabited by a race of powerful dragons. the surface is covered in a layer of the etheria crystal, and its essentially the equivalent of the ground in a zelda game. and, like zelda, the surface of etheria is divided up into a series of dungeons, also known as dungeoneers, one for each dungeon. a dungeon is made up of four distinct areas which are called etherian zones. youre able to travel between zones by grabbing a portal located at the edge of the floor, and youll be able to travel from any zone to any other in the game. the game is said to contain anywhere from 20-40 dungeons depending on which version youre playing. dungeon defenders is all about teamwork. but how does a game about that work? well, in dungeon defenders, each player is given a specific job. your job dictates the strengths of your character, and youll automatically equip the items appropriate for that job. as an example, let us say youre a warrior. since warriors can use most items, you have a very wide selection of equipment to choose from. you can equip swords, bows, or you can even equip a magic wand. youre allowed to choose your preferred job, and once youre done, youre ready to go. the game keeps track of which jobs are required, and your job queue is your highest priority job. on top of that, each job allows you

to upgrade a certain number of times. dungeon defenders is no longer the little indie game everyone seemed to be looking for, and for that i commend the developers. the game is a blast. there is a lot to love here, even if youre not sure youre gonna keep playing this game long term or if youve already played it. it has some very admirable qualities, some disappointing flaws, and a very good selection of content that will keep you occupied for a long time. its a must play if youre looking for a great action rpg.

in addition to the normal game, you also have the option of purchasing an expansion called dungeon defenders: the board game. this is a series of four games that you can play with up to four players. but it doesnt exactly break new ground in this genre, it just adds some new objectives to the usual tower defense gameplay.

all in all, its a very fun game and a perfect combination of tower defense and co-op action. the graphics are above average and the sound is a good fit. theres plenty of content and plenty of ways to play with your friends, and if youre looking for a great co-op game, this is your ticket. so download dungeon defenders for \$15, get playing, and dont forget to add your friends to play with you! on the positive side, dungeon defenders is a game with a lot of potential for improvement. its got modding, sure, but also a

procedural dungeon generation and variety in enemy types. all of these are things that would be extremely helpful to fans of the genre. on the negative side, the endgame of the game is essentially a boss fight. and while it is incredibly fun to fight those bosses, there doesnt really seem to be any reason for them to exist beyond the endgame. in fact, the endgame is so short that i was left wondering if the game was really over before it was finished. dungeon defenders is currently available on pc for \$15.00. it requires the unity game engine (which is free to download and is also required by other mods of the genre). if youre interested, here is the direct link to the game you can download and play as well as some screenshots of the game in action. dungeon defenders will be one of my most played games of 2012 and the pixel dungeon mods will hopefully be the reason why. its worth checking out. 5ec8ef588b
