[Download](#)

FLAV FLV to AVI Converter is an application built to help you encode your FLV movies to AVI format with ease. Not too complicated to handle FLAV FLV to AVI Converter comes with a clean interface. Most of its space is used to display the imported files. Once you run the tool, insightful steps are provided for adding files, trimming the videos, selecting the output format, picking the saving directory, and much more, so that the accommodation to the basic functions of the program shouldn't be a problem

to any type of users. The tool lets you add single or multiple files at once. The desired videos can be imported in the main window using either the built-in browser or drag-and-drop support, and then you may proceed with the conversion. Once the encoding has started, a progress bar is shown, providing you information about the current process. After the conversion is done, you can set the program to open the output folder, turn off your computer, and much more. Supports a wide range of video formats FLAV FLV to AVI Converter works with a large variety of video

formats, such as FLV, MPG, MKV, MP4, and much more, but the output file is limited to AVI. After you are done with importing files and selecting the saving folder, you can start tweaking the output settings. You can select from a predefined set of options or you can use the advanced settings provided by the program for a more thorough customization. You are offered the possibility to change the video resolution, frame rate, encoder, and bitrate, as well as alter the audio sample rate, channels, and much more. The program can also be used

to trim larger files, crop out the part that you are interested in, and change the volume of the output item up to 400% louder.
