Simple to use tool that enables you to encode/decode pieces of text, thus ensuring their safety. The software uses advanced algorithms and a user-provided secret key word/phrase in order to encrypt a message, paragraph or piece of text. The software can also decode previously encrypted text. Secure your private memos, messages, writing Advanced Text Encrypter Crack brings a convenient and trustworthy method for protecting the privacy of text messages. The software does not allow you to set passwords for the files that contain the information, instead to encrypt the data itself. Thus, you may apply advanced protection algorithms that convert the words into character strings. The process of encoding starts with a secret key, which is a user-provided word/character sequence. This is also the key used to deciphering the text, in the same application that encoded it. The software uses an advanced encryption system, based on a two-layer encoding process. The first key is embedded in the program's code, while the second is the custom phrase provided by the user, which is automatically converted to SHA256 hash before usage. These two elements compose the final AES encryption algorithm that the software applies to the text. Reversing the encryption: deciphering the codes Advanced Text Encrypter Download With Full Crack can also decode the text you previously encrypted, by applying the process in reverse. You are required, of course, to provide the secret key, without which the process is invalid. Simply paste in the character sequence, enter the key and the software can decode it for you. The information regarding capitalized letters however is not maintained. The software supports pasting the text from clipboard, in both cases: encryption or decryption. It cannot automatically save it to a text file or import such a document in order to extract the information from it. Moreover, keyboard shortcuts for selecting the entire encrypted text are disabled. Reliable tool for encoding messages Whether you wish to encode messages, simple login credentials or other pieces of text, Advanced Text Encrypter Cracked 2022 Latest Version offers a suitable solution. Due to the advanced algorithms used to encrypt the text, it is highly difficult to decode it using other applications. The software can encode the text, but also restore it to its original form.
