Keymacro is a powerful multi-keyboard recorder for Mac OS X. It enables you to record your keyboards actions by "hooking" into the Mac OS X Keystroke events with zero hassle. It works with OS X 10.4 Tiger or later and includes a range of keyswitch code libraries. You can define shortcuts for AppleScript, Menu, and AppleEvents keystrokes. It can record up to five non-overlapping keystrokes. Instantly record keyboard actions, like TextEdit editing your documents, or Mac OS X menu actions. Set up key bindings with ease to create system-wide shortcuts. Record multiple-keystrokes in a logical order. Drag an activity into the order list to define key sequences. Keymacro records all keystrokes as a file or CD audio track, which you can edit for upload or download. It's great for customers that don't have access to a Web site or have a slow connection. Mac OS X and Windows compatible. Keymacro is the ultimate Mac OS X keyboard recording utility and works with both Mac OS X Tiger or later and Windows XP, Vista, and 7. Keymacro also includes a Mac OS X text editor application for those of you who are Mac OS X power users. It enables you to record text edits for submission to the TextEdit application. Mac OS X 10.5 Leopard includes an integrated Keymacro editor, making it the perfect alternative to the Mac OS X application. Download Keymacro and take your Mac OS X keyboard recording to the next level with one click! Whats New in Version 1.4: New AppleScript and AppleEvent Recording: - TextEdit - Menu - iTunes - Expose - Location - Mouse & Keyboard
